

Définition du collège
(θ angle aigu)

$\cos \theta = \frac{\text{adj}}{\text{hyp}} \quad \sin \theta = \frac{\text{opp}}{\text{hyp}} \quad \tan \theta = \frac{\text{opp}}{\text{adj}}$

💡 La définition du lycée généralise celle du collège

Relation fondam.

$\cos^2 x + \sin^2 x = 1$
(ou $\cos^2 x = (\cos x)^2$ et $\sin^2 x = (\sin x)^2$)
